

Redstone Adopt-A-School Program

Redstone Vision: *Helping members, their families, and our communities achieve their financial dreams.*

Redstone Mission: *Improving the financial well-being of our members, and communities by offering trusted advice, choices, opportunities, and solutions.*

Redstone has always been financially supportive of our local educational systems, and in particular with our Title One Schools. Last year Redstone donated pens, pencils, folders, and rulers to all Title One Schools in our branch footprint.

While donating funds, and supplies is great, the goal of this program is to build lasting relationships amongst our branch staff and local schools who are in desperate need of volunteers.

Schools are continually searching for volunteers to support teachers and student's needs/wants. These needs can range from, and not limited to, lunch buddies, field day assistance, guest speakers, reading support and more.

This program helps to strengthen the relationships between the schools and Redstone, creating positive change between schools and local businesses by offering hands-on assistance when available. Branches act as an advocate for the local schools within the community.

The Branch/Department Adopt-A-School program supports the Redstone mission and guiding principles by extending our capacity to impact, improve and be the catalyst for positive change in our communities.

Currently, thirty-four local schools are a part of this program. If you would like your school to be considered to be adopted, please reach out to community@redfcu.org to be placed on our list.
